CDM Designers Responsibility Awareness Briefing

Aims

To provide designers with an overview of their responsibilities under the Construction (Design and Management) Regulations.

Objectives

At the end of the briefing designers should be able to:

- State their responsibility as per the CDM Regs
- Define construction and when the regulations apply
- Identify situations that cause concern
- State the consequences of non compliance with the regulations

Programme Content

- Introduction
- General health and safety responsibilities
- What is construction? A definition
- When do the CDM regulations apply?
- Who is a designer?
- Responsibilities for designers
- Relevance of Design Risk Assessments
- Designer's relationship with client
- Designer's relationship with CDM Co-ordinator
- Designer information for the pre construction information pack
- Designer information for the health and safety plan
- The health and safety file
